

Assignment-4
IBM object storage & IBM Watson

Date	19 September 2022
Team ID	PNT2022TMID32326
Project Name	News Tracker Application
Student Name	KIRUBAKARAN P
Student Roll No	810019104035

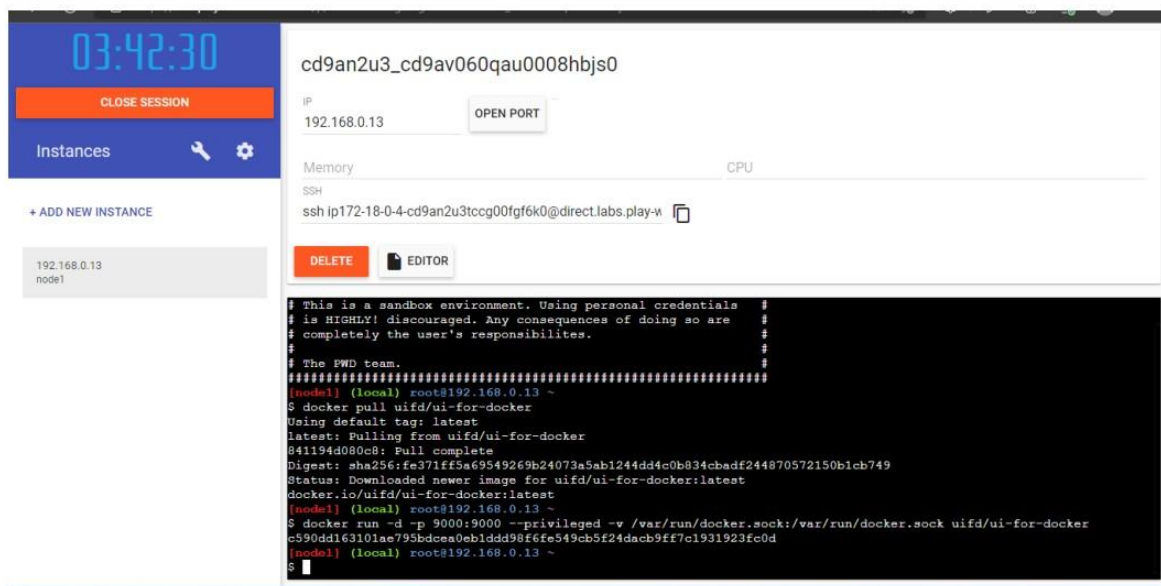

Assignment Kubernetes / Docker:

1. Pull an Image from docker hub and run it in docker playground.
2. Create a docker file for the job portal application and deploy it in Docker desktop application.
3. Create an IBM container registry and deploy a hello world app or job portal app.
4. Create a Kubernetes cluster in IBM cloud and deploy hello world image or job portal image and also expose the same app to run in node port.

1. Pull an image from docker hub and run it in docker Playground

The screenshot shows the Docker Hub repository page for `uifd/ui-for-docker`. The page header includes the Docker Hub logo, a search bar with the text `uifd/ui-for-docker`, and navigation links for Explore, Repositories, Organizations, and Help. A user profile for `jayakamlesh` is visible in the top right corner. The repository page itself features a blue cube icon, the repository name `uifd/ui-for-docker` with a star icon, and a pull count of 10M+. Below this, it states "By `uifd` • Updated 6 years ago" and provides a description: "A web interface for Docker, formerly known as DockerUI. Deprecated, use Portainer for new features." There are tabs for "Other" and "Image". The "Overview" tab is selected, showing a section titled "UI For Docker" with a note that the repo is deprecated and development continues at `portainer/portainer`. A "chat on gitter" link is also present. A "Docker Pull Command" box displays the command `docker pull uifd/ui-for-docker`. The Windows taskbar at the bottom shows the time as 8:38 PM on 10/25/2022.

The screenshot shows the Docker Playground interface. On the left, there's a sidebar with a clock showing 03:42:30, a "CLOSE SESSION" button, and a list of instances. The main area displays the IP address `192.168.0.13` and an "OPEN PORT" button. Below this, there's a section for "Memory" and "CPU" usage, and an "SSH" command: `ssh ip172-18-0-4-cd9an2u3tccg00fgf6k0@direct.labs.play-w`. A "DELETE" button and an "EDITOR" button are also visible. The terminal window shows a series of commands and their outputs:

```
# This is a sandbox environment. Using personal credentials #
# is HIGHLY! discouraged. Any consequences of doing so are #
# completely the user's responsibilities. #
# The FWD team. #

```

2. Create a docker file for the job portal application and deploy it in Docker desktop application.

The image shows a Windows command prompt window titled "C:\Windows\System32\cmd.exe" displaying the output of a Docker build command. The build process is for a Docker image named "job-portal-main" based on the "python:3.6" base image. The output shows the build context being loaded, the Dockerfile being processed, and the image being built. The build progress is shown as a series of steps, including resolving the base image, pulling the Dockerfile, and building the image layers. The final output shows the image being pushed to the Docker registry.

```
C:\Windows\System32\cmd.exe
-> [internal] load build definition from Dockerfile
-> [internal] load .dockerignore
-> [internal] load metadata for docker.io/library/python:3.6

Use 'docker scan' to run Snyk tests against images to find vulnerabilities and learn how to fix them
C:\Users\VK-PC\Desktop\job-portal-main>
```

The screenshot also shows the Docker Desktop interface. The "Images" tab is selected, showing a list of local images. The "job-portal-main" image is highlighted, showing its details, including the tag "latest", the image ID "e17d7e64dcb0", the creation time "about 23 hours ago", and the size "1.08 GB".

NAME	TAG	IMAGE ID	CREATED	SIZE
au.icr.io/jobportal-mai...	jobportaltesting	e17d7e64dcb0	about 23 hours ago	1.08 GB
hello-world	latest	feb5d9fea6a5	about 1 year ago	13.26 KB
jayakamalesh	latest	e17d7e64dcb0	about 23 hours ago	1.08 GB
jayakamalesh/job-port...	latest	e17d7e64dcb0	about 23 hours ago	1.08 GB
job-portal-main	latest	e17d7e64dcb0	about 23 hours ago	1.08 GB

The bottom status bar shows the system resources: RAM 2.67GB, CPU 1.16%, and Connected to Hub. The version is v4.13.0.

3. Create an IBM container registry and deploy a hello world app

```
